### **DETAILED ACTION**

This action is responsive to applicant's 5/23/2008 communication.

#### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. This amendment was approved by applicant's representative on 9/17/2008

The application has been amended as follows:

#### **IN THE CLAIMS:**

Claims 1-4 are cancelled.

#### ***Allowable Subject Matter***

Claims 5-7 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest an arrangement in accordance with the claims wherein visually encrypted image data is presented in one portion of a predetermined area of an image and a filter image in at least one color tone for making the visually encrypted image visible is presented in another predetermined area of an image, and a transmission system sends the hidden data and the filter image data to a user's terminal device.

The nearest prior art, including prior art presented in the International Search Report fails to teach the presentation of an encrypted portion side by side with a filter portion in the appropriate color tone together in an image for transmittal a user, even though the combination of multiple images in general is known.

As for the prior art presented by in the first action, the examiner agrees with the applicant's assessment that this reference is not applicable because it does not involve visual encryption nor the use of a filter image to make a visually encrypted image visible.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Remarks***

The examiner notes that US 5,984,367, of record in the 2/18/2005 IDS, teaches a card that has visually encrypted data which can be held up to a computer screen having a certain color tone which renders the image visible. This might render claims 1, 2 and 4 obvious. JP 2001-312657, also of record in the 2/18/2005 IDS, teaches an arrangement where the card is the color filter and the computer screen displays visually encrypted data. This might render obvious claim 3.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL A. HESS whose telephone number is (571)272-2392. The examiner can normally be reached on 8:00 AM - 5:00 PM M-F.
